

Hexacomb®
FALCONBOARD®
 Stronger. Flatter. Greener. Better.

The Environmentally Responsible Graphic Board

Hexacomb® Falconboard™ (USA) is a rigid graphic display board made from reusable, renewable and 100% recyclable honeycomb material consisting in SFI certified, natural kraft core with white clay-coated or natural linerboard facings. Produced with up to 20% chlorofluorocarbon-free recycled paper content, Falconboard emits less than 1% volatile organic compounds (VOCs). These characteristics make it an excellent “green” alternative to traditional synthetic rigid substrates keeping the quality capabilities required for wide format digital printing.

KEY FEATURES

- 100% Eco-Friendly, all natural, renewable virgin and post-consumer recycled fibers.
- Free of VOCs (volatile organic compounds) and chlorofluorocarbon.
- Ideal for high resolution digital direct printing (UV inks).
- Compatible with most silk-screen inks and self-adhesive media.
- Super strong clay-coated surfaces provide bright colors, no “read-through”, no topography in images.
- Exceptionally rigid and lightweight. Save on shipping costs.
- Durable, scratch and warp resistant.
- Compression strength = 70 lbs. per sq. inch.
- Standard thicknesses from 1/4” to 2”.
- Standard sheet size: 48” x 96” (48” x 88” for Export).
- ECONomical and ECOlogical alternative to PVC, polystyrene (PS), acrylic, wood, MDF and drywall.
- Easy to cut with manual and digital cutters.
- Heavy-duty box packaging avoids material damage during transportation, minimize waste.
- Edging solutions provided by DGS BOARDers™ Honeycomb Finishing System.
- Cutting solutions provided by DGS SAMURAI V-CUT™ and DYSS V-PRO™ Digital Cutters
- Designing made easy by KASEMAKE™ software (Falconboard templates library included).
- SFI certified.

Thickness	Size (Inches)	Sheets/ Box	Boxes/ Pallet	Sheets/ Pallet	Weight/ Sheet
1/4"	48" x 96"	24	6	144	8lb
3/8"	48" x 96"	16	6	96	8.8lb
1/2"	48" x 96"	12	6	72	9.6lb
