

Roots

DGS ECO FRIENDLY PRODUCT LINE

The industry is “going back to the roots” and DGS, conscious of the environmental impact of the graphics production, offers now a complete line of rigid materials compatible with, UV, Latex and Eco-Solvent Inks

RIGID SUBSTRATES

Hexacomb® **FALCONBOARD®***

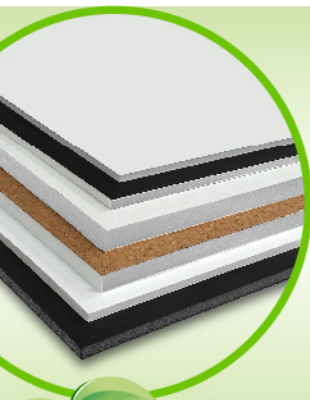

Stronger. Flatter. Greener. Better.

- 6, 10 and 13mm honeycomb structured graphic display board
- 100% Eco-Friendly, all natural, renewable virgin and post-consumer recycled fibers
- Exceptionally rigid and lightweight. Save on shipping costs
- Ideal for high resolution digital direct printing (UV inks)
- Good alternative to PVC, polystyrene (PS), acrylic, wood, MDF and drywall
- Best for POP displays, trade show booths, store decorations, etc.
- Available in Standard, All White & All Kraft

DGS **Eco-Board** NEW

- Print Quality Corrugated Cardboard
- Double sided white surface for direct UV ink printing.
- Available in 1.5 (E), 3 (B), 4 (C), 4.5 (EB) and 7 (BC) mm thickness (sheets of 48" x 96")
- Ideal for temporary Point Of Purchase (POP) displays and packaging
- **NEW** Premium Ultra White, Kraft and Kraft Heavy Weight
- The most affordable rigid substrate in the market

FOME-COR®

Clay-coated and CFC free to protect the environment

- Premium bright white clay-coated faces
- Good dimensional stability
- Available in 3/16" (5mm) and 1/2" (13mm)
- White and Black
