\*1: LH-100, LUS-120 and PR-200 come in both 250ml and 1L bottles. \*2: MCT works only with white ink \*3: The LUS-350 will be applied later. \*4: The PR-200 is not compatible with LUS-350. \*5: The LUS-350 will be applied late \* Stretchability of flexible ink may vary depending on materials, please have a prior test print. \* LH-100, LUS-120 and LUS-150 are GREENGUARD Gold cartification ink.

### Optional Accessories

Item	Item No.	Remarks
lonizer kit	OPT-J0342	Static eliminator kit
Vacuum unit ( $\varphi$ 3mm × 200mm) ( $\varphi$ 0.1 in. × 7.9 in.))	OPT-J0216	Three-phase, 200 V-240 V, 30 A, 3.4kW
Vacuum unit ( $\varphi$ 1mm × 200mm) ( $\varphi$ 0.04 in. × 7.9 in.))	OPT-J0217	Single-phase, 200 V-240 V, 30 A, 1.9kW
Vacuum unit ( $\varphi$ 3mm × 400mm) ( $\varphi$ 0.1in. × 15.7 in.))	OPT-J0232	Three-phase, 380 V-480 V, 20 A, 3.4kW
Optional blower Connector Kit	OPT-J0348	Necessary kit for connecting an optional vacuum unit
4C+4White ink applying kit	OPT-J0499	Necessary kit for 4C+4White ink set

\*The optional accessories available with JFX200-2513 are also compatible with JFX200-2513 EX. \*OPT-J0393 PR-100/PR-200KIT is not necessary to use JFX200-2513 EX. However when starting to use PR-200, it is necessary to replace to the pump of the initial attachment.

### Inks and substrates:

•As physical properties of ink (adhesion, weather resistance etc.) are different depending on media, please be sure This product is equipped with UV irradiation equipment to have a print test in advance

Depending on the application, primers, other surface treatment or surface protection such as lamination may be necessary.

### About Ethernet

\*Please use Category 6 (CAT6) network cables. \*Cannot be connected through the router \*When printing from ethernet, place the printer and output PC on the same network. \*When using a switching hub, a 1000BASE-T compatible hub is necessary. \*Although up to 4 printers can be registered with RasterLink6Plus, printing may stop depending on the network environment.

### A Safety notice:

Please pay attention to the following notes in order to use safely.
Do not look directly into the UV light source nor place your hand, or expose your skin directly to the UV light source. •Depending upon print mode, some VOC emittance from printed parts not vet cured and hardened may occur. In addition, please be sure to read and follow the instructions and guidelines of the manual carefully.

•Some of the samples in this catalogue are artificial renderings. •Specifications, design and dimensions stated in this catalogue may be subject to change without notice (for technical improvements, etc). The corporate names and merchandise names written on this catalogue are the trademark or registered trademark of the respective corporations. Inkjet printers print using extremely fine dots, so colors may very slightly vary after replacement of the printing heads. Also note that if using multiple printer units, colors could vary slightly from one unit to other unit due to slight individual differences. The specifications described in this catalog are as of October 2019.

# Semi-stereoscopic 2.5D printing made easy ! High value-added printing with "2.5D Texture Print" in "RasterLink6Plus"!

Stereoscopic appeal with 2.5D printing

A newly developed function, "2.5D Texture Print" in Mimaki's original RIP, "RasterLink6Plus" allows you to easily create multi-layered gradation data.

The "Emboss Print", one of Mimaki's printing solutions, "Surface Imaging" makes a surface look bumpy with multi-layered UV ink printing, which requires a manual preparation of step-wise data for each layer to create smoother expression. However, "JFX200-2513EX" allows you to easily create 2.5D print data of different layer with steps, simply by using "RasterLink6Plus" (Standard accessory) and Illustrator/Photoshop

othness cannot be achieved. but data is needed for each layer but sm

### You can create data using Photoshop/Illustrator and RASTERLINK SPLUS only.

Simple creation of smooth-stereoscopic 2.5D prints is available with the JFX200-2513 EX to easily show the bumpy surface like woodgrain of interior material, elevated ink of oil-paintings and letters for an impressive look for signage. Not only coloring but also adding smooth print texture can deliver added value.

### Higher-grade productivity and doubled White + Color simultaneous print speed!

### The printer allows you to respond to demand for short-term delivery.

JFX200-2513 EX prints two times as fast as JFX200-2513 in White + Color simultaneous printing. The newly added Draft mode (300x300HQ 4P Bi Normal) can deliver print speeds up to 35m2/h (376.7 ft2/h) in 4-color + White simultaneous printing.

\*Time taken for setting materials and the printer's operating time before or after printing are not considered

### I You can choose the most suitable ink depending on your material and application.

or stereoscopic effects can be applied.				Please use OPT-J0499(4C+4Wthie ink applying kit) for [4C+4W] printing.

k, s and materials is improved. LH-100 LUS-120		Features	The LH-100 ink has a high scratch/chemical resistance and an accurate color reproducibility. The ink is suitable for rigid materials.	The LUS-120 ink has 170% stretchability after curing. Its ink film is very flexible and will not crack during post process.	The LUS-150 ink has 150% stretchability after curing and will not crack during post print process. This ink is compatible with a wide range of materials and has a low degree of tackiness.	After curing, the ink can stretch up to 350% when heated to between approx. 120 and 200°C. The ink restores its rigidity after being cooled, maintaining its molded shape when heated and high durability.

# The NCU is newly mounted !

### Links with external stop interface allow users to meet safety standards that are different by factory

Other than the standard emergency stop switch, customers can also have the printer work with safety measures that suit their environment The product can support various safety standards depending on the customer, including safety light curtain and safety mat.

NEW!!

### 1. Waveform control

By discharging spherical ink droplets directly, depositing of droplets and overlapping between dots is reduced, achieving a sharp print quality with low grain.

<Non-spherical discharge:

### < Discharged in a nearly true spherical state >

High precision landing is possible. Sharp finish with little grain.

## 2. Variable dots

Three different ink dot sizes are used in printing to enable high-quality prints with reduced graininess.

< Fixed Dot Image

### < Variable Dot Image >

Dots are combined including the minimum size of 5pl to enable grainless, smooth color printing.

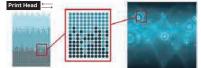

### 3. MAPS (Mimaki Advanced Pass System)

Banding (horizontal stripes), uneven color, or glossy streal can be reduced to produce smooth prints by printing pass boundaries fading in gradation.

### < Without MAPS (Image) >

### < With MAPS (Image) :

Based on printing conditions such as media/ink type and resolution, the most suitable gradation pattern is automatically selected and printed.

NEW!!

With Ethernet support

## Usability achieved based on

### Mimaki's long time experience UV flatbed printers

As a pioneer of UV flatbed printers,

Mimaki knows everything about ease of use from its long experience. We provide the design that is simple to use and reduces workload, plus a preventive safety function to avoid trouble during printing.

### Foot switch for vacuum control

More environment-friendly business model

Head

Mimaki UV inks (LH-100, LUS-120 and LUS-150) obtain certification for GREENGUARD GOLD. The "GREENGUARD Gold certification" ensures that products are acceptable for use even in environments such as schools and medical facilities based on the most strict global standard of chemical substance diffusion. The GREENGUARD Gold-certified inks consider onmental impacts given after printing.
