Your Fast Track to
STRUCTURAL DESIGN

DGS is a CREATE-PRINT-CUT specialist, pioneer in delivering comprehensive solutions to the large format graphics industry since 1993. For the past 18 years, it has dedicated itself to the development of a concept related to the creation, printing and cutting of rigid paper-based materials for manufacturing of countless structural applications.

Conscious of the need to use sustainable materials, DGS makes available to Printers all the experience accumulated over all these years, which includes full knowledge of materials, development of accessories, creation of designs and the know-how to process all these elements in harmony. DGS goal is to simplify the learning curve for Printers who want to be part of this important trend in the market, in other words...
